Introduction

The human body can sometimes generate voltages of up to several thousand volts from static electricity on objects or between two objects, which can cause electrical and electronic equipment circuits to malfunction or even damage. EDS 30T is a state-of-the-art intelligent electrostatic discharge generator with an output voltage of 30 kV. It is also China's first independently developed and produced electrostatic discharge simulator that integrates discharge gun head and touch screen control. It accurately simulates electrostatic discharge pulse interference in accordance with EN/IEC 61000-4-2 and other requirements, designed according to ergonomics. The LCD touch screen is simple and easy to operate, with AC and battery pack options for power supply, replaceable RC module, and built-in temperature and humidity meter, ensuring reliability in various testing scenarios.

Features

- > Ergonomic design;
- > LCD touch screen;
- > All-in-one design (no base unit);
- > Changeable R/C networks;
- > Automatic polarity switching;
- > Battery or mains operation, long battery life;
- > Temperature and humidity monitoring;
- > Built-in standard test library;
- > Intelligent detection the failure of air discharge.

Application Areas

- > Communication
- > IT
- > Telecom
- > Military
- > Medical
- > Avionics
- > Broadcast
- > New Energy
- > Railway
